Project DOHA as a fulfillment of regulatory mandates and directives for SOE Sharia Credit Guarantee Efficiency

Overview

The Mandate

IFG, as the holding of both entities, delivered an **order to streamline** its sharia financing guarantee SOEs since January 2026, aligning with **Danantara's directive** to improve SOEs efficiency.

Methodology & Data Sources:

Integrated Financial Forecast

Driven by a **5-year standalone and pro-forma** financial forecast with dynamic assumption drivers and synergies

Valuation Method

Primary Basis: KJPP Appraisal

Dated 30 September 2025, sets the exchange ratio: *Confidential Data*

Confidential Data

DCF (FCFE)

14,21% cost of equity (6,80% SBN 10Y + 0,95 beta x 7,80% ERP), 2,50% terminal growth, plus capital surplus adjustments. Sensitivity run at CoE 13–15% and TG 2–3%.

Market Approaches with Multiples Implied by KJPP:

Confidential Data

applied to book value and net income across 2025A–2027F.

What to expect for the upcoming slides:

Company Profiles & Performance

Merger & Valuation Analysis

Post Deal & Commercial Impact

Risk Watchlist

*Analyst estimates are subjective, further due diligence required.

Sharia Guarantee differs from conventional insurance by risk avoidance and binding contracts

Concept and Regulation

Kafalah bil Ujah

A **non-cancellable guarantee (akad)** issued by **Guarantor** to fulfill debtor obligations in exchange for an **ujrah (fee)**.

Insurance

- **Loss Funding Mechanism** driven by the Law of Large Numbers.
- Standalone primary contract protecting the direct interests of the policyholder.

Credit Guarantee

- **Loss Avoidance Mechanism** rooted in selective underwriting (selected risk).
- Contract follows the principal financing agreement

Sharia Guarantee Principle

Strict Prohibition of Haram Elements

Fully compliant with **POJK 2/POJK.05/2017**, strictly **eliminating Riba (usury), Maisir (gambling), Gharar (uncertainty), and Zalim (injustice)**.

Ta'widh (Compensation for Actual Loss)

Compensation is **restricted exclusively to proven**, actual financial **losses** resulting from default and **prohibits fixed-percentage** interest. (DSN-MUI Fatwa No. 43/2004)

Subrogasi Rights Execution

Transfer recovery rights to Penjamin post-claim payment, executed via creditor mandate. (DSN-MUI Fatwa No. 104/2016)

Sharia Asset Management & Governance:

Investment portfolio has to be **Sharia-compliant instruments** (Mudharabah deposits, Sukuk SBSN, Sharia Mutual Funds) **under direct oversight** of the Dewan Pengawas Syariah (**DPS**).

Indirect Scheme Drives Scale and Cost Efficiency, While Direct Scheme Preserves Risk Control

Business Model

Direct Scheme (CBC)

- **Application is initiated** directly between *Debitur and Penjamin/LKS*. (1-3)
- **LKS then requests a term agreement from the guarantor**, who performs underwriting before issuing SP3 (4-9)
- Lastly, **financing is disbursed** to the debtor (10)

Commercial Cash Financing

Non-Cash Financing
(Surety Bonds, KBG)

Large-Ticket Projects.

Indirect Scheme (CAC)

- Guarantee is **initiated and administered** entirely through **partner banks** (LKS/BUS/UUS) without direct Debitur-Penjamin interaction.
- **Automatic coverage** is granted for financing portfolios that meet underwriting criteria.

KUR

Micro Financing

Mass Consumer Loans
(KPR, KKB)

While CBC (Case-by-Case) protects margin on large projects, CAC (Conditional Automatic Cover) drives mass volume that requires strict partner audits to keep combined ratios low.

The financing contract limits risk exposure, while asset placement rules maximizes sharia-compliant investment returns

Business Model

Akad Pembiayaan (Product Segments & Coverage Scope)

Debt-Based Products (Murabahah & Istishna'):

Coverage: **Principal + Fixed Profit** Margin (Fatwa DSN-MUI No. 04 & 06/2000).

Products: KUR Syariah, Commercial Cash Financing, Multiguna (consumer loans), KPR, KKB.

Equity/Profit-Sharing Products (Mudharabah & Musyarakah):

Coverage: **Principal ONLY** (Sharia explicitly forbids guaranteeing unearned profit share - Fatwa DSN-MUI No. 07 & 08/2000).

Core Segments: Productive SME Working Capital & Project Financing/Syndicate.

Lease-Based & Non-Cash Products (Ijarah, IMBT, & Suretyship):

Coverage: **Rental Lease Value** (Ijarah/IMBT) or **Contract Guarantee** Amount (Kafalah).

Core Segments: Non-cash financing, Bank Guarantee(KBG), Surety Bonds (Bid, Performance, Advance Payment).

Akad Pengelolaan Aset Investasi (Asset Placement Rules)

Liquidity & Working Capital (Mudharabah / Wadi'ah):

Instruments: Giro Wadi'ah, Deposito Mudharabah Muthlaqah (pooled funds) & Muqayyadah (restricted).

Purpose: Ensures high liquidity to support short-term claim payouts

Fixed Income & Capital Preservation (Sukuk SBSN & Korporasi):

Instruments: Sovereign Sukuk (SBSN) via Ijarah Sale & Lease Back, Wakalah bi al-Istitsmar, & A-rated Corporate Sukuk.

Purpose: High-yield fixed income to hit investment target (targeting Rp161.4B basis).

Growth & Capital Surplus (Reksa Dana Syariah):

Placed in Sharia Mutual Funds to manage technical reserve surplus using Wakalah bil Ujrah.

Sharia Guardrails & Oversight:

All asset placements are strictly screened against non-compliant elements (Riba, Maisir, Gharar) under direct DPS oversight.

Uncaptured market opportunity provides growth headroom, but capital constraints and high claim ratios may limit capture rate

Market Overview

Market Size

Uncaptured Market Potential: Rp265.57 Trillion (~3.7× current industry size) remains unbacked by Sharia guarantee representing ~Rp5.28 Trillion in untapped annual gross IJK fees.

9 out of 10 Rupiah of Sharia financing run uninsured. Bottlenecks stem from guarantor capital constraints as showed:

Tailwinds

Strong Banking Liquidity with Financing to Deposit Ratio of 83.78%. BUS liquidity is underutilized, providing an active credit pipeline for bulk *penjaminan* expansion.

The 2024–2028 OJK Roadmap **targets increasing the guarantee-to-GDP** ratio from 2.6% to 3.5% and directing 90% of portfolios to SMEs.

BUS Gross NPF is low at 2.29% while Net NPF is at 0.82%, keeping **underlying claim frequencies manageable across bank partners** for a healthy credit.

Headwinds

4/5 of gross IJK is consumed by claim payouts with a high Private Claim Ratio (80.19%), **squeezing underwriting margins** and relying heavily on investment yields

92.4% of industry **investment assets are locked in Sovereign Sukuk** (55.8%) and Bank Deposits (36.6%), making net profits **vulnerable to national yield-curve declines**.

PT Jaminan Pembiayaan Askrindo Syariah

Acquirer Profile

Company Snapshot

PT Jaminan Pembiayaan Askrindo Syariah (JPAS) is Indonesia’s first sharia guarantee company that provides productive and micro financing guarantee for Indonesian sharia financial institutions.

Established: 2012

Ownership: Askrindo 99,99%, YDKKA 0,01% with IFG as the holding

Network: 41 outlets including 16 branch offices & 25 marketing representative offices

JPAS is **dominated** by **productive guarantees** with **61,0%** of retained exposure (Rp21,85 T of Rp35,78 T), with KUR and Mikro alone accounting for 81,7% of the portfolio.

*2026 figures are internal data and analyst estimates subject to change.

ROE:	15.07%	
ROA:	5.21%	
Nett claim ratio:	71.04%	
Gearing Ratio:	29.65x	

Financial Position (May 2026):

Total Assets	Confidential Data
Total Liabilities	
Total Equity	
Net guarantee outstanding	

Earnings:

Rp (in millions)	FY2025	May 2026
Gross IJK	834,065	Confidential Data
Net Kafalah Income	206,708	
Investment Income	153.658	
Net Profit	163.183	

Portofolio & Positioning (2025)

Heavy reliance on Conditional Automatic Cover (CAC) in **Micro & KUR drives high volume** but limits direct risk screening for underwriting, which **exposes JPAS to sudden loss ratio spikes** (ta'widh). Additionally, 88% of total outstanding exposure (Rp54.81 T of Rp62.37 T gross) is **heavily concentrated among 3 banking partners**: BSI (46.9%), PNM (22.2%), and BSN (18.9%).

PT Jamkrindo Syariah

Target Profile

Company Snapshot

PT Jamkrindo Syariah (Jamsyar) is a sharia guarantee company that serves **financing, housing, and non-cash guarantees, including surety bond and customs bond**

- Established:** 2014, a spin-off from Perum Jamkrindo’s Shaira division (operating since 2007)
- Ownership:** Jamkrindo 99,93% · Koperasi Warga Jamkrindo Sejahtera 0,07% with IFG as the holding
- Network:** 18 offices including 1 head office and 17 branches

*2026 figures are internal data and analyst estimates subject to change.

Total Assets	Confidential Data
Total Liabilities	
Total Equity	
Net guarantee outstanding	

Earnings:

Rp (in millions)	FY2025	May 2026
Gross IJK	321,993	Confidential Data
Net Kafalah Income	153,090	
Investment Income	96,920	
Net Profit	141,032	

Portofolio & Positioning (2025)

Jamsyar is **dominated by non-productive guarantees** with **66,3%** of retained exposure, **driven by FLPP housing and Multiguna**, with productive gearing at just **5,97x** of a **17,70x** total

JPAS and Jamsyar dominate sharia guarantees, surrounded by regional UUS and conventional guarantee entities

Competitive Landscape

Company		Ownership	Business Lines	Presence
	PT Jaminan Pembiayaan Askrindo Syariah (JPAS)	Askrindo 99,99%; YDKKA 0,01% with IFG as the holding.	Strong focus on Productive and Corporate Financing Kafalah products, KUR, KBG, Surety	41 outlets: 16 branch offices & 25 marketing representative offices
	PT Penjaminan Jamkrindo Syariah (Jamsyar)	Jamkrindo 99,93%; Koperasi Warga Jamkrindo Sejahtera 0,07% with IFG as the holding.	Provides guarantees for MSMEs, retail & micro sectors, Multiguna financing, surety bond, customs bond, KPR FLPP	1 head office and 17 branch offices
	PT Penjaminan Pembiayaan Daerah NTB Syariah (Perseroda)	Pemerintah Provinsi Nusa Tenggara Barat	Productive and Corporate Financing Kafalah products	Limited to the West Nusa Tenggara region
	Unit Usaha Syariah PT Jamkrida (Perseroda)	Pemerintah Provinsi Setempat sesuai wilayah cabang	MSMEs Kafalah/Guanrantee products	Focused in each region, such as Jakarta, West Java, Banten, West Sumatra, Riau, etc.

JPAS and Jamsyar are the only **two key players** operating nationwide with **comprehensive branch networks** (41 and 18 outlets) and full cash/non-cash product suites.

Regional Competitor: Other Sharia guarantors consist of regional BUMD and provincial Sharia Units (UUS). Their reach is geographically locked to local provincial banks (e.g., Bank NTB Syariah, Bank BJB Syariah).

Additionally, POJK 10/2023 mandates regional UUS (such as Jamkrida Jabar UUS with Rp5.62T volume) to spin off into full standalone Sharia entities by 2028–2031. This regulation creates **potential new direct competitors or even portfolio acquisition targets**.

JPAS Revenue Outpaces Jamsyar After 2021–2022 Peaks, as Investment Yields Recovered Underwriting Declines

Historical Revenue & Profit Trajectory

Both entities operated at an **identical revenue scale during their peaks** between 2021 and 2022

By **2025, JPAS has rebounded** to 86.5% of its peak volume (Rp834.1B), whereas **Jamsyar has collapsed** by 33.6% (Rp322.0B)

Jamsyar suffered for four consecutive years of revenue contraction (-47.5% , -18.9% , -9.7% , and -12.6%)

JPAS 2025 net profit climbed despite a significant fall in 2022, while **Jamsyar net profit faced a turnaround** improvement in 2024–2025, **driven by** a Rp138.5B **loss provision reversal (CKPN)**

Investment returns fund a majority of the net revenue since 2022 for both entities.

Both entities' **investment portfolios** are heavily concentrated in **Sovereign Sukuk (SBSN)**. This portion **exposed both entities to** interest rates, yields, and other macroeconomic factors.

JPAS and Jamsyar Untold Stories Driven by Gearing Capacity and Underwriting Quality

Balance Sheet & Claim Ratios (2020-2025)

Asset Growth Divergence

- **JPAS Balance Sheet Expansion:** Total assets grew +160.6% from Rp1.26T (2020) to Rp3.28T (2025), driven by aggressive portfolio volume expansion.
- **Jamsyar Balance Sheet Stagnation:** Assets surged to Rp2.45T in 2021 but remained stagnant through 2025 (Rp2.46T; +0.6% over 4 years), which reflects underwriting contraction.

Equity and Capital Expansion

- **Jamsyar Unutilized Capital Buffer:** Jamsyar holds Rp1.41T in equity (FY2025) with a low gearing ratio of 17.70x, accumulating retained earnings without active business expansion.
- **JPAS Capital Bottleneck:** JPAS expanded its equity to Rp1.17T but faces severe capacity constraints with gearing hitting 29.65x.

Significancy of underwriting loss

- **Claims Spike in JPAS:** Gross claim ratio spiked from 2022 to 2025, driven by default surges in Micro and KUR portfolios.
- **Jamsyar Underwriting Deficit:** Jamsyar's gross claim ratio breached 100% in 2023 (117.7%), indicating severe underwriting losses before stabilizing to 84.1% in 2025.

Reinsurance absorbs the loss

- **Net Loss Exposure:** JPAS net claim ratio surged from 19.9% (2021) to 71.0% (2025). This proves that underwriting quality is sacrificed for volume growth.
- **A help from reinsurance:** While reinsurance absorbed part of Jamsyar's 2023 peak (reducing net claims from 117.7% to 85.7%), both entities face compressed net underwriting margins.

Source: Company's Financial Statements & Report

Underwriting Loss Ratios Squeeze Margins, while Claims Reduce Returns

Profitability, Expense, and Combined Ratio Analysis

- **Lean Operating Structure:** JPAS expense ratio improved consistently across six years, dropping from 36.1% (2020) to 14.6% (2025)
- **Jamsyar Opex Spike:** Jamsyar’s expense ratio spiked to 57.8% in 2024 due to an impairment charge rather than operational overhead.

- **Volatile Loss Ratio:** JPAS loss ratio surged by 2.5× from 27.9% (2022) to 69.8% (2025), while Jamsyar was also climbing in 2022 but recovered significantly before going slightly up again.
- **Compressed Profit Margins:** JPAS combined ratio expanded from 49.3% to 84.4% while Jamsyar was trying to recover, supported by its improving loss ratio.

JPAS Estimated Valuation Compared to KJPP Appraisal Price

Valuation: Football Field

Assumption: Consolidation done by 2026

Methodology

DCF:FCFE

P/BV Implied

P/BV Ratio: 1.09x – 1.28x (2026)

P/E Implied

P/E Ratio: 7.15x – 7.67x (2026)

Implied Value (Rp Million)

The estimated 2026 KJPP appraisal price sits near the DCF relative price, which shows strong alignment across asset value, earnings capability, and market multiples.

*2026 figures are internal data and analyst estimates subject to change.

Strategic Alignment Between JPAS and Jamsyar Will Solves Core Capital, License, and Portfolio Bottlenecks

Deal Rationale

Unlocking Capital Capacity

- Generated Rp834.07B Gross IJK (FY25) and grew +37.32% in Q2 2026 while Jamsyar contracted by 12.6%.
- Powered by 41 outlets and ±626,000 clients across Indonesia.

Operating Cost Discipline

- Reduced expense ratio to 14.59% vs. Jamsyar’s 19.80% in 2025.
- Incurring Rp63.65B in Opex vs. Jamsyar’s Rp76.99B despite managing nearly 3x more revenue.

Idle Capital & Gearing Headroom

- Lower gearing ratio opens a headroom for both productive and non-productive contributions

Non-Productive Opportunity

- Non-productive business carries 66.3% of Jamsyar's exposure against 38.95% at JPAS
- Unique selling points in FLPP housing line, Multiguna, Customs Bond, Surety, and KBG

Strong Cash Conversion

- JPAS generated Rp297,62B of operating cash flow in 2025, 12x more than Jamsyar.
- Converts 1.82x of net profit to cash (2025), whereas Jamsyar has been stagnant below 1.0x for 4 consecutive years.

Leading Productive Franchise

- Holds 66.38% of national KUR Syariah with Rp21.85T in productive exposure against Jamsyar's Rp8,40T.
- Stands at 18.10x (90.5% of 20x cap), leaving only Rp2.29T in productive room and requiring non-productive lines for further scale.

Proven Claim Recovery

- Jamsyar recovers 42.03% of claims through subrogation, compared with JPAS's 10.01%.
- Jamsyar's net claim ratio was 21.2 points below its gross ratio in 2025, while JPAS's net ratio exceeded its gross ratio every year since 2020.

Consolidation Transaction Details

Deal Rationale

Sources and Uses of Funds

SOURCES	Rp Million	USES	Rp Million
New JPAS shares issued: 375,019 shares@ [redacted]	Confidential Data	Jamsyar net assets acquired at book value	Confidential Data
[redacted]	Confidential Data	Excess of fair value over book value	
Cash/external debt raised	0		
Total Sources	Confidential Data	Total Uses	

Goodwill/PPA

Purchase Price Allocation	Rp Million
Fair value of consideration (KJPP) 2025	Confidential Data
Less: book value of net assets acquired	
Excess of fair value over book value	

Under **PSAK 38**, this excess is not recognised as goodwill. Because both entities are under common control, the transaction is a consolidation of entities under common control and would be accounted for on a pooling-of-interests basis: assets and liabilities carried at book value. The PPA above is illustrative and will not hit future earnings.

Financing Type

	Consideration	Newly issued JPAS shares
	Exchange basis	KJPP 30 Sept 2025 fair value or roll forward to 2026 estimated value
	Total shares	400,000 to 775,019
	Ownership	JPAS 51.61% / Jamsyar 48.39%

100% Equity, no cash or acquisition debt consideration

Expected Synergies

Cost Synergies

1. Kafalah reinsurance savings
2. Overlapping functions
3. IT & Admin integrations
4. Core system consolidation
5. Marketing consolidation
6. Non-personnel Opex efficiency
7. Expense ratio in control

Revenue Synergies

1. Gearing ratio headroom
2. Non-productive products access
3. Distribution leverage
4. Portfolio rebalancing

Risk & Capital Synergies

1. Subrogation recovery efficiency
2. Productive gearing ratio relief
3. Cash conversion discipline

Assumption drivers discussed more on the appendix and merger model. Assumptions are analyst estimates.

*2026 figures are internal data and analyst estimates subject to change.
Source: Company's Financial Statements & KJPP Valuation

Operational Excellence and Synergies Drives Long-Term Margin Expansion

Post Deal Financial Analysis

Net kafalah income grows **11,9%** a year to Rp1.5 trillion by 2030, while gross profit compounds at **15,7%** and net profit at **19,6%**. In which will widen the gross and net margins.

- **JPAS is the primary growth driver**, generating 63.7%–65.2% of consolidated income at an **11.3% CAGR**.
- Standalone **Jamsyar growth moderates to 6.8% CAGR**, while **revenue synergies scale rapidly** from 0.4% (2026E) to 7.7% of total income (Rp115.2B by 2030F) as **newly unlocked gearing capacity is deployed**.

Net synergies shift from a **deficit in 2026** to up to a **value creation of 27% net profit in 2030**. By 2030, revenue synergies account for up to 60%, cost savings up to ±30%, and the remainder is from risk & capital efficiencies. This breakdown shows that the **synergies are growth-driven** rather than solely cost-cutting efficiencies.

Source: Historical financial performance, analyst calculation

EPS Will Cross Over Between 2028 or 2029

Post Deal Financial Analysis

EPS Accretion / (Dilution): KJPP 2025 vs Roll-Forward 2026E

The consolidation will be resulted in **dilution for several years**. However, this can be **reversed by synergy realization, core efficiency, and capital expansion**. Any value creation can **slowly push the dilution toward accretion** under conditions where these **synergies are progressively realized**.

EPS Trend

Why the deal shows dilution?

EPS is formulated as follows:

$$\frac{\text{Net Income}}{\text{Shares Outstanding}}$$

A/D analysis formed by the formula:

$$\frac{\text{Pro Forma EPS}}{\text{Acquirer EPS}} - 1$$

A 100% stock deal result is set by the relative P/E. A higher P/E than the target's is accretive, and paying with a lower one is dilutive.

JPAS P/E at 7,67x < Jamsyar P/E 10,15x

If synergies are less than target:

- A/D will always dilutive if no value creation is made, but accretion is feasible when synergies are present, though the breakeven might take longer

Path to Accretive:

- Add net income
- Fair value discount
- Cash consideration

Pro-Forma Expected Financial Ratios

Post Deal Analysis

- ROE grows from 11.3% to 15.7% despite a 57% equity growth, demonstrating that absorbed capital is actively deployed rather than idle.
- NPM widens to 35.0%, enabling the merged entity to retain over one-third of every rupiah of Gross IJK by 2030.
- ROA improves from 5.2% to 7.7% against 45% asset growth; this proves earnings generation outpaces balance sheet expansion.

- Combined ratio improvement is linear with the improving expense ratio as two entities consolidate.
- Loss ratio remains conservative at 61%, caused by normal credit risk modelling. Meaning that profit growth can be sustained without dependence on better credit risk underwriting.

Liquidity Analysis

Metric	2026E	2027F	2028F	2029F	2030F
Cash Ratio	0.79x	0.92x	1.06x	1.20x	1.36x
Quick Ratio	4.66x	4.69x	4.80x	4.99x	5.20x
Current Ratio	5.59x	5.56x	5.63x	5.79x	5.98x

The cash ratio extends from 0.79x to 1.36x as cash grows at 24.0% CAGR against current liabilities at 8.2%

Solvency Analysis

Metric	2026E	2027F	2028F	2029F	2030F
Equity Ratio	45.63%	46.37%	47.29%	48.37%	49.48%

Equity ratio rises to 49,48% because equity compounds at 12,0% a year against assets at 9,7%. Retained earnings accumulate faster than the balance sheet, with no dividend assumed.

Source: Historical financial performance, analyst calculation

A Commercial Expansion is Beneficial for the Success of Consolidation through Broad Network

Post Deal Analysis

JPAS Productivity Lines Capacity

Productive limit is used (18/20x)

Category	Gearing Ratio
Productive Lines	18.10x
Non-Productive Lines	11.5x
Total	29.65x

Jamsyar’s Potential to Close The Gap

Cateegory	JPAS		Jamsyar	
	Amount	%	Amount	%
KUR	Confidential Data	63.5%	Confidential Data	60.8%
Micro		18.2%		1.7%
Konsumtif & Multiguna		14.7%		7%
FLPP/KPR		0.2%		18.9%
KBG & Surety		0.3%		9.6%
Retail & Corp		3.2%		2%
Total		100%		100%

Line	Combined Position YBMP Dec-2025 (Rp Million)	Key Facts	Decision	Rationale
 KUR	62,6% of combined book, JPAS 69,8%	- Largest line for both entities - Significant overlap in partners and pricing	Consolidate onto one platform	Eliminate duplication in partner relationships, underwriting, pricing, and servicing.
 Mikro	JPAS holds 95,9%	49,9% of JPAS volume 4,0% UW margin, 92,7% loss ratio - Consumes productive sub-cap	Maintain	Protect scarce productive capacity. Reprice and tighten underwriting to improve unit economics.
 Konsumtif & Multiguna	JPAS 82,2% of combined, Jamsyar 17,8%	- JPAS’s line healthy - Jamsyar’s Multiguna fell 25,2% → 7,0% in one year	Maintain	Retain JPAS’s platform. Diagnose causes of Jamsyar’s decline before merging books.
 Perumahan (FLPP/KPR)	Jamsyar holds 97,7%	- JPAS only 0,2% - Jamsyar’s core strength	Adopt Jamsyar’s platform	Leverage proven FLPP platform and scale through JPAS’s 41 offices.
 KBG & Surety	Jamsyar holds 94,1%	JPAS writes Rp4,2B vs. Jamsyar Rp60,5B	Adopt Jamsyar’s platform	Use existing capabilities. Accelerates scale without building from scratch.
 Retail & Korporasi	2,8% of combined book, but JPAS’s most productive line per rupiah	124,9% UW margin* - Negative loss ratio reflects reserve release	Maintain and grow	Small but highly profitable. Sub-scale, not unprofitable. Support targeted growth.

* Retail & Korporasi UW margin reflects a reserve release and is not a run-rate.

A Commercial Expansion is Beneficial for the Success of Consolidation through Broad Network

Post Deal Analysis

Growth Matrix

KUR IS THE ONLY LARGE, GROWING LINE
KUR accounts for 62,6% of the combined book, with 55,0% underwriting-result growth and a 43,5% margin.

MIKRO IS GROWING, BUT RETURNS REMAIN WEAK
Mikro grew 48,1% but earns only a 4,0% margin. Growth in this segment consumes productive capacity without generating comparable underwriting returns.

KONSUMTIF IS PROFITABLE BUT SHRINKING
Konsumtif & Multiguna declined 31,1% while maintaining an 88,9% margin, the second-highest in the book.

The Trade JPAS is Making

Line	Change in UW Result (YoY)	UW Margin
Mikro	+Rp3,2B	4,0%
Konsumtif & Multiguna	(Rp9,6B)	88,9%

JPAS added underwriting result from Mikro while giving up a larger amount from Konsumtif, shifting the mix toward higher volume but lower-margin business.

Value Creation from the Merger

Jamsyar brings two lines that are largely absent from JPAS: housing, where it holds 97,7% of the combined position, and KBG & Surety, where it holds 94,1%.

Both lines have grown within Jamsyar's portfolio: housing increased from 16,9% to 18,9%, while KBG & Surety increased from 4,3% to 8,7%.

Both are non-productive lines, allowing the combined company to use remaining non-productive capacity rather than the constrained productive sub-cap.

Key Transaction Risks and Concrete Mitigation Roadmaps

Risk & Mitigation

The hardest integration problems are not technical. Two of the top three sit in underwriting, who may approve a guarantee, and how much risk one bank may carry.

No	Risk Name	Impact	Likelihood	Mitigation Strategy
1	Counterparty concentration breach	High	High	Map combined exposure per bank before close; agree revised limits with partner banks
2	Underwriting authority mismatch	High	High	Map Jamsyar's CAC/CBC split before day one; issue a single delegation matrix; freeze non-standard approvals during transition; joint credit committee for 12 months.
3	Dual core systems through 2030	High	High	Build an API layer first, not a full migration; unify reserving definitions ahead of the platform; daily reconciliation
4	Re-kafalah treaty misallocation	High	Medium	Renegotiate treaties by segment, not in aggregate; shift cession away from Konsumtif toward Mikro; single reinsurance panel; quarterly cession review.
5	Integration cost overrun	High	Medium	Track cost-to-achieve against the limit; charge the full amount to the P&L in reporting
6	Reserving methodology divergence	Medium	High	Harmonise ta'widh recognition and subrogation timing before the first joint close; parallel-run both methods for two quarters; external actuarial review.
7	Personnel synergy delay	Medium	High	Publish the target operating model within 90 days; name role owners before restructuring; retention arrangements for underwriting and actuarial staff.
8	Client overlap above the 15% allowance	Medium	Medium	Deduplicate the debtor base pre-close; single relationship owner per partner; tiered outreach to shared obligees before announcement.
